

# WESTON'S FARM

## Cut-Your-Own Trees

We grow over 5,000 Balsam and Fraser Fir trees.

**The fields are open the day after Thanksgiving with trees up to 10' tall. Trees over 8' will go quickly. There will be a decreasing selection of the remaining trees as Christmas approaches.**

The CYO trees are located in a scenic field 1/8 mile from the farm market in Fryeburg. You will need to drive to the field **after** you check in at the farm. The road is well maintained. We will provide you with a bow saw and twine to get your tree out of the field. There are no employees in the field to assist you, so be prepared to cut and load the tree yourself.

After you cut your tree, bring it back to the farm to pay for it (there will be additional sales tax). If you would like the tree wrapped for transport, that is done at the farm for an additional cost of \$1.00 per tree. We can also help secure your tree on your vehicle. Please check in at the farm before going to the field.

### Pricing:

Trees are progressively priced according to height, quality and species.  
Colored flagging at the tip of the tree designates price.

**Untagged Trees = \$36.00**

**Red Tags = \$45.00**

**Blue Tags = \$55.00**

**White Tags = \$65.00**

### Hours:

CYO Trees are open every day

9:00am to 4:00pm.

*(The market is open until 6:00pm)*

### Balsam Fir:

Known for their strong scent  
and dense shape.

### 2017 SPECIFIC INFORMATION:

We only have a handful of trees left on the hillside behind the market. Please be prepared to drive to the lower field for a tree.

We will be limited on Fraser Firs for the next several years due to a break in the planting schedule. We have planted more, but they are still young.

On October 30, 2017 our fields were flooded as a result of the strong storm that knocked out power to much of Maine. This left leaves and grass in many of the trees. There may also be a fine silt in the bottom few feet. We have spent a lot of time cleaning, but it is not possible to get all of it. We certainly apologize for any added work this may cause.

### Frequently Asked Questions:

*Can I let my dog out in the field?* Unfortunately no. Even dogs on a leash can cause unwanted issues (like errant messes that are not nice to lie in while cutting a tree).

*Can I save a tree to cut at a later date?* Unfortunately no. The simple truth is that we have found that some customers will not respect the saved tree and cut it anyway.

*Can I bring my own saw?* Yes

*Can I walk to the trees?* Technically yes, but it is not encouraged. It is a long walk back while lugging a tree.

*Why do the trees have dead needles on the inside?* As the trees grow and become more dense, light is cut off to the interior parts of the tree and the needles die. This happens to all pruned trees. After you cut the tree, shake out the dead needles – the green ones will remain.

*How old are the trees?* A 7' tree is approximately 13 years old.

*Do you sell dug trees that can be replanted?* We do not. Check with a nursery company in your area.

*Do you use pesticides on your trees?* No. There are no sprays on the trees or ground.
